Re: Emery Deep Mine Permit C/015/015
Midterm Review task id #4363

Dear Mr. Haddock:

Per your July 3, 2013 Midterm Review memo Task #4363, and subsequent deadline extension to September 14, 2013. Please consider this request for additional time to complete the mid-term responses. Due to the mine being idle and difficulty in obtaining previous files, Consol is requesting the following:

The deadline to submit the responses to the first two listed deficiencies (R645-301-241,341,352) be extended until Spring of 2014.

- With regard to the first two deficiencies and referenced site visit dated October 2011, Consol proposes to convene a meeting on site sometime in November 2013 to formulate a path forward. This extension request is necessitated by the fact that the end of the field season is approaching for the vegetation and soils consultant and due to prior commitments, they are unavailable to meet until later this fall.

The deadline to submit the responses to remaining 4 deficiencies (R645-301-731.210, 731.214, 525.440, 830.140, 112.330) below be extended until October 14, 2013.

- The annual Emery Town Well data has been located and a report should be finalized this week.
- The subsidence monitoring data has been located and field review to update the report will commence this week.
- The new Ownership and Control is complete.
- The revised draft bonding calculations have been sent to James Owen for review.

If you have any questions concerning this request, please contact me at (724) 485-4267.

Sincerely,

Kerry Goodballet P.E.
Director of Permitting – Coal
